

## Special Issue

# The EU's Energy Security and the Green Deal

### Message from the Guest Editors

- Recent global events have highlighted several major energy security issues not only in Europe but also internationally. In parallel, the European Green Deal emerged as the EU's response to overcome the environmental and energy challenges of the 21st century. Starting from the current security conditions and the introduction of the European Green Deal, the main purpose of this Special Issue, which is titled "The EU's Energy Security and the Green Deal", is to highlight both the politics of the Green Deal and the energy security issues in the European Union. The research contributions of this Special Issue may include either evaluation of the economics of the European Green Deal or case studies related to energy security challenges in the wider area. Original research papers, reviews, successful case studies and applications, as well as opinion papers of high quality and novelty on "The EU's Energy Security and the Green Deal" are more than welcome.

### Guest Editors

Dr. Georgios Maris

Prof. Dr. Konstantinos Hazakis

Prof. Dr. Aggelos Kotios

Prof. Dr. Panagiotis Liargovas

Dr. Spyridon Roukanas

Prof. Dr. Pantelis Sklias

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
