

## Special Issue

# Circular Economy, Environmental and Energy Management

### Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances related to the impact of the different tools that currently exist, as well as those that will arrive in the coming years, to help organizations improve their activities in the fields of energy consumption, environmental, and circular economy impacts. In addition, it is very important for customers, investors, and end users to be able to visualize and differentiate between different products and companies according to their energy, environmental, and circular economy impacts. Topics of interest for the publication include, but are not limited to, the following:

- Renewable energies.
- Energy management systems (ISO 50001, etc.).
- Energy communities.
- Environmental management systems (ISO 14001, EMAS, etc.).
- Circular economy.
- Circular economy management systems (AFNOR XP X 30-901:2018, etc.).
- Eco-labels.
- Digital product passport.
- Technologies that help to improve energy, environmental, and circular economy activity.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.
