

Special Issue

Management and Optimization for Renewable Energy and Power Systems: 2nd Edition

Message from the Guest Editors

We are pleased to share the success of our Special Issue, “Management and Optimization for Renewable Energy and Power Systems”. In the first volume, we successfully published five papers; these can be found via the following link:

https://www.mdpi.com/journal/energies/special_issues/843Q83H275 We are now preparing to launch the second volume of this Special Issue, “Management and Optimization for Renewable Energy and Power Systems: 2nd Edition”.

This Special Issue addresses management and optimization for renewable energy. The focus includes the methods and techniques regarding the planning/operation of power systems with a high penetration of renewables. Approaches to integrating these resources into electricity markets, as one of the main drivers for their efficient use, are also welcome. It is recommended to send a tentative title and a short summary of the manuscript to our Section Manage Editor Mrs. Cicilia .

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
