

## Special Issue

# Green Energy from Soil Remediation

### Message from the Guest Editors

Green energy is recognized as a sustainable solution to issues related to environmental concerns and the depletion of non-renewable energy sources. It also aligns with the circular economy, which is sustainable and is recommended as an alternative for mitigating the negative impact of soil contaminants. Green energy also involves promoting renewable energy production and by implementing hydro, wind, and solar projects and projects centered on biomass utilization. A sustainable strategy for soil remediation should consider using biomass not only for producing bioplastics, biomaterials, and chemicals but also for processing it into bioenergy in solid, liquid, and gaseous forms. The answer lies in a new integrated strategy for phytoremediation and bioenergy, based on the supported and enhanced cultivation of energy crops on contaminated soil in accordance with the concept of sustainable development. This Special Issue aims to present the latest achievements and in-depth research in this field, focusing on all aspects of soil remediation under the pressure of a wide range of contaminants, resulting in green energy, which is crucial in the sustainable development strategy.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
