Special Issue

Sustainable Development: Policies, Challenges, and Further II

Message from the Guest Editors

Sustainable development is present in almost every aspect of today's life, affecting governments, organizations, the energy and business sectors, societies, and people. Implementing sustainable development requires many different activities in three main areas-economic, ecological, and social. These activities, on the one hand, are the result of the formulated goals of sustainable development. On the other hand, they arise from the constantly changing conditions in which we currently operate. As a result, sustainable development remains a current topic. A key question at the moment is how the last two years of the COVID-19 pandemic will affect the implementation of the assumptions, goals, and objectives of sustainable development, not forgetting, however, about continuous development, which also influences the shaping of this concept. Therefore, this Special Issue aims to present the very concept of sustainable development and define/identify its future challenges as well as directions for further development.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
