

Special Issue

Transformation of Energy Markets: Description, Modeling of Functioning Mechanisms and Determining Development Trends – Second Edition

Message from the Guest Editors

This Special Issue addresses the global energy transformation and related changes in the functioning of energy markets. It also addresses the issue of the rapidly growing renewable energy sector and its increasingly strong links with the electricity market and the primary fuel market. Topics of interest for publication include:

- Energy transformation, energy markets;
- Primary fuels, electricity, and renewable energy markets;
- Institutional determinants of development of energy markets;
- Current state and development prospects for energy markets;
- Prosumers, low-emission economy;
- Modeling dependencies on energy markets;
- Forecasting prices on energy markets.

Guest Editors

Dr. Michał Bernard Pietrzak

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
