

Special Issue

The Current Energy Triad: Poverty, Transition and Security

Message from the Guest Editors

The purpose of this Special Issue is to collect relevant studies from both the EU and other countries to identify measures to reduce energy poverty, to achieve a faster and easier transition towards the use of renewable resources in energy production, and to promote actions for the development of investments in the field of energy in order to reduce the level of dependence on imports. These measures, actions, and projects can be incorporated into the energy policies of EU countries, in specific laws such as the law on poverty reduction, or targeting social protection measures for vulnerable energy consumers. Additionally, this Special Issue aims to promote some good practices and quality interdisciplinary research on the factors, limits, risks, and opportunities for smart energy consumption based on an increased share of renewable sources, increased energy efficiency, policy recommendations addressing wider energy access, increased affordability for individuals, and closing the gap between SMEs and energy poverty.

Guest Editors

Prof. Dr. Catalin Popescu

Prof. Dr. Mirela Panait

Prof. Dr. Valentina Vasile

Dr. Eglantina Hysa

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
