

Special Issue

High-Power Electronic Device Technologies and Its Applications

Message from the Guest Editors

This issue on “*High-Power Electronic Device Technologies and Its Applications*” will gather reviews, regular research papers, and communications on scientific research, technological development, engineering policies, and management studies related to the general field of power electronics. Our aim is to encourage scientists to publish their experimental, numerical, and theoretical results in as much detail as possible, with no restriction in terms of the maximum paper length. Full experimental details must be provided to allow for result reproducibility. For numerical simulations, an accurate description of the methods and mesh sensitivity is mandatory. Papers are accepted in the following fields:

- Power electronic materials and devices
- Electrical power systems
- Power condition monitoring and health
- Energy use in industry
- Energy economics and policy (in relation to power electronics)

Guest Editors

Dr. Amador Pérez Tomás

Dr. Xavier Perpità

Dr. Miquel Vellvehí

Dr. Xavier Jordà

Dr. José A. Rebollo

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
