## Special Issue

# Economic Analysis and Policies in the Energy Sector—2nd Edition

## Message from the Guest Editor

Recently, there has been a growing research interest in tackling various environmental problems, with associated findings related to empirical applications and their policy implications. The aim of this Special Issue is to consider economic analyses in terms of the most updated and advanced empirical and theoretical methods applied to energy problems. The progress of the green economy includes methodological issues in order to indicate and present spatio-temporal patterns of resource and energy use and its associated pollution. Results will be discussed in support of sustainable energy policies. This Special Issue seeks the methodological framework to contribute to sustainable energy policy development, provide energy policy initiatives targeted to socio-economic goods/benefits to capture sustainability obstacles and negative environmental impacts, and to highlight the links and interactions between economic and environmental systems. The expected outcome is to set targets, propose models for sustainable growth and energy policies, and analyze policy interactions. Potential contributors include researchers and specialists in energy economics and policies.

## **About the Journal**

## Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

## Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

## **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.
