

Special Issue

Advanced Computational Fluid Dynamics (CFD) and Heat Transfer Studies on Cryogenic Flow and Its Systems

Message from the Guest Editors

The present Special Issue of *Energies* aims to gather innovative research and the latest developments in cryogenic computational fluid dynamics (CFD) and heat transfer. More specifically, topics of interest for the Special Issue include (but are not limited to):

- Numerical methods and simulations of two-phase flow and phase change heat transfer in cryogenic fluids.
- Cryogenic fluid storage, transport, measurement technologies for aeronautical, astronautical, and ground vehicles. Advanced green propulsion, ground transportation, energy system conceptual design based on cryogenic fluid dynamics.
- Thermal management, fluid-thermal-structure coupling analysis for advanced electro-mechanical actuation systems.

Guest Editors

Dr. Yong Chen
Dr. Chenzhen Ji
Dr. Yongchao Sun

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
