

Special Issue

Recent Challenges in Buildings Ventilation and Indoor Air Quality

Message from the Guest Editors

Recent challenges in building ventilation and indoor air quality (IAQ) have been influenced by emerging health concerns, technological advancements, and changing outdoor environmental conditions. Some of the key challenges related to IAQ and ventilation in buildings deal with the following topics.

1. Health and Well-Being;
2. Energy Efficiency vs. IAQ;
3. Technological Integration;
4. Climate Change and Standards Evolution. The submission of scientific papers addressing the former topics is welcome in this Special Issue about "Recent Challenges in Buildings Ventilation and Indoor Air Quality".

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
