

Special Issue

Advanced Energy Systems in Energy Resilient, Zero/Positive Energy Buildings, Communities and Districts

Message from the Guest Editors

Authors are welcome to submit papers on one or more of the following topics related to advanced energy systems in net-zero/positive energy buildings and districts:

- Concepts, definitions and KPI development of energy-resilient nearly/net/zero and positive energy buildings/communities/districts;
- Advanced HVAC systems in buildings;
- Heating/cooling energy and electricity demand;
- Advanced short/long-term energy storage for heating/cooling/electricity and controls;
- Renewable-based energy generation and smart control;
- The energy resiliency of buildings during grid outages under various weather, economical and political conditions;
- Energy resilience in buildings/districts;
- Active and passive habitability and survivability conditions in buildings/districts;
- Energy flexibility offered by buildings, communities and districts to the grid;
- Energy self-sufficiency of buildings, communities and districts;
- Advanced simulation and optimization methods;
- Experience and results from demos and monitoring sites;
- Economic-, social- and policy-related aspects.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
