

Special Issue

Carbonate Reservoirs, Geothermal Resources and Well Logging

Message from the Guest Editors

The title of the Special Issue combines the subjects, which together, may turn out to be an efficient and effective tool in the prospection and recognition of new hydrocarbon and water resources. In this Special Issue, we would like to present papers dealing with current problems related to measurements, processing, and interpretation of well logs used in various projects for the prospection of hydrocarbons in carbonates and for geothermal reservoirs. We invite authors specializing in technological novelties and those who would like to show statistical methodologies for processing big data sets and using old data together with the newest results for reinterpretation. Well logging should be seen in all its variety as a useful tool for carbonate reservoirs for hydrocarbon and geothermal waters.

Guest Editors

Prof. Dr. Jadwiga A. Jarzyna

Dr. Bogdan Mihai Niculescu

Dr. Edyta Puskarczyk

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
