

## Special Issue

# DC/DC Converters Optimized for Energy Storage in Smart Grids

### Message from the Guest Editors

During the last decade, smart grids have improved security defense capabilities, flexibility, and compatibility through intelligent means in order to strengthen the development, transmission, and consumption of clean energy, as well as to counter the increasingly frequent natural disasters and external interference. Energy storage technology is a crucial component of this process. This Special Issue aims to enhance energy storage utilization in and the fault-crossing capability of smart grids by optimizing DC/DC converters, which are important components of energy storage technology. The topics of interest for publication include, but are not limited to:

- the optimization of topologie;
- the control and fault-crossing capability of DC/DC converters;
- the modeling, analysis, and design of DC/DC converters for energy storage in smart grids;
- control optimization.

---

### Guest Editors

Dr. Chuyang Wang

College of Energy and Electrical Engineering, Hohai University, No. 1 Xikang Road, Gulou District, Nanjing 210098, China

Dr. Jia Liu

Department of Automation, Hangzhou Dianzi University, Hangzhou 310018, China

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
