Special Issue

Energy Transition and Economic Growth

Message from the Guest Editor

Clean energy can drive innovation, create jobs, and boost industries, but it also brings challenges. These include energy price fluctuations, infrastructure changes, and policy uncertainties. The economic impact of this transition varies across countries, depending on financial development, governance, and technological progress. This Special Issue explores how energy transition and economic growth influence each other. It aims to provide empirical and theoretical insights into how energy structure shifts affect economic development, productivity, and sustainability. We invite original research and review articles on topics including, but not limited to, the following:1. Energy Transition and Economic Development 2. Best Practices for Sustainable Energy Transitions 3. Social and Technological Impacts of Energy Transition 4. Comparative and Regional Studies We look forward to receiving high-quality submissions that advance knowledge on the energy transition and its economic impacts.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
