

## Special Issue

# Recent Advances in Natural Gas Combustion and Emissions of Conventional Powertrain and Hybrid Propulsion Systems II

### Message from the Guest Editors

We are inviting submissions to our Special Issue of *Energies*. With the increasing global environmental awareness and the imposed continuously stringent emission standards in various fields of transportation, the topic of natural gas combustion has attracted a lot of attention in recent years. Various hybrid propulsion systems such as natural gas engine/electric systems can be a very promising alternative to conventional propulsion systems in light of the current operational, economic, life-cycle carbon footprint, and local infrastructure limitations of fully electric propulsion systems. Hence, nowadays, there is a large number of conventional (dual-fuel, spark ignition) and advanced (RCCI, HCCI, PCCI, SACI, etc.) technologies, which can be used to further seriously improve the operational and the environmental performance of existing and new powertrain systems. Additionally, natural gas is a very attractive alternative fuel for hybrid systems such as conventional natural gas engines/electric systems, and for other hybrid schemes such as conventional natural gas engines/fuel cells/batteries propulsion systems.

### Guest Editors

Dr. Theodoros Zannis

Associate Professor, Hellenic Naval Academy, Piraeus, Greece

Dr. Elias Yfantis

Senior Scientist, Cyprus Marine and Maritime Institute, Larnaca 6023, Cyprus

### Deadline for manuscript submissions

closed (1 June 2023)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
