Special Issue

Energy Management Strategies of Electrified Vehicles toward the Real-World Driving

Message from the Guest Editors

The aim of this Special Issue is to bridge the gap between the theoretical development and practical application in energy optimization of the electrified vehicles. We hope this Special Issue will inspire the researchers from the fields of optimization and learning algorithm, system control, and automotive engineering to challenge the issues of energy management and powertrain control strategy targeting practical use in the real world.

Guest Editors

Prof. Dr. Tielong Shen

Energies

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
CiteScore - Q1 (Control and Optimization)
