

Special Issue

Advanced Optimization and Control Strategies of Electric Vehicles and Green Energy Systems

Message from the Guest Editors

This Special Issue will cover promising, recent, and novel research trends in the optimization and control strategies of electric vehicles and green energy systems to help address potential difficulties and challenges in green-energy-based transportation electrification. Authors are encouraged to submit original research and review articles with theoretical, methodological, or practical focuses. Topics of interest for publication include, but are not limited to:

- Advanced optimal planning and operation methods for promoting green energy in transportation electrification
- Impact of electric transport on the green-energy-based power systems
- Analysis and discussions for transportation decarbonization pathways
- Power-to-hydrogen-based electrification solutions for the transportation sector
- Emission and environment impact of transportation electrification
- Energy storage systems promoting green mobility
- Vehicle-to-X and X-to-vehicle systems
- Machine learning in power systems

Guest Editors

Dr. Mingfei Ban

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
