

Special Issue

Performance Analysis of Building Energy Efficiency

Message from the Guest Editors

Buildings represent a significant portion of global energy consumption and greenhouse gas emissions. Enhancing their energy efficiency is essential for mitigating climate change and achieving sustainability goals. Consequently, there is a growing need for robust methodologies and tools to assess and optimize the performance of buildings in terms of energy efficiency. This Special Issue seeks to address this need by providing a platform for researchers, practitioners, and policymakers to present their latest findings, methodologies, and case studies related to building energy efficiency performance analysis

Guest Editors

Prof. Dr. Vincenzo Corrado

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
