

Special Issue

Advances in the Development of Geoenery: 2nd Edition

Message from the Guest Editors

The use of unconventional oil and gas resources has increased in natural gas and oil production worldwide in recent decades. The science and technology involved in the development of unconventional oil and gas resources not only play indispensable roles in petroleum engineering but are also crucial for various areas such as geological carbon dioxide capture, utilization and storage (CCUS), hydrology, geothermal energy production, and so on. Potential topics include, but are not limited to, the following:

- New methods to test and characterize properties of unconventional oil and gas reservoirs;
- Hydraulic fracturing of unconventional oil and gas reservoirs;
- Effective techniques to enhance recovery of unconventional oil and gas reservoirs;
- Artificial intelligence in unconventional oil and gas development;
- New science and technology involve in unconventional oil and gas development;
- Developmental technologies for new energy resources (e.g., hydrogen energy and gas hydrate);
- Carbon-reducing technologies (e.g., CCUS) in unconventional oil and gas development.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
