

Special Issue

Energy Consumption Structure and Economic Growth

Message from the Guest Editors

The structure of energy consumption is usually put forward in accordance with the stage of economic development. A higher level of growth is associated with increasing levels of environmental depreciation if several factors as: energy technology, energy policies, regulations and institutions are not considered. The goals of sustainable development are related to low-emission economies. A sustainable economic development requires a specific energy mix and appropriate energy policies supporting the increasing energy demand and also avoiding environmental degradation. The nexus between energy consumption structure and sustainable economic growth, as well as its transmission mechanism reveal new and unexplored direction of research. As the guest editors of the Special Issue of *Energies*, we would like to invite potential authors to contribute with papers dealing with the following topics, but not limited to them:

- energy consumption structure
- economic growth
- sustainable development
- technology innovation
- environmental degradation
- clean energy
- environmental quality
- clean energy
- climate-neutral and low-emission economies

Guest Editors

Prof. Dr. Olimpia Neagu

Faculty of Economics, Computer Science and Engineering, "Vasile Goldiș" Western University of Arad, 310025 Arad, Romania

Dr. Syed Tauseef Hassan

School of Business, Nanjing University of Information Science and Technology, Nanjing 210044, China

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
