

## Special Issue

# Advances in Cooperative Control and State Estimation of Power Systems with Large Scale Renewable Energy Sources

### Message from the Guest Editors

This Special Issue aims to present and disseminate the most recent advances that are able to address challenges induced by large-scale RES integration, as discussed above. Topics of interest for publication include, but are not limited to, the following:

- Operation and control of power systems with new energy sources.
- Measurement and control of transportation energy integrated systems.
- Modeling and control of renewable power generation.
- Life cycle assessment, pricing, policies, and energy planning.
- Artificial intelligence for renewable energies.
- Advanced monitoring, diagnosis, and big data analytic methods of electrical equipment.
- Ultra-low- and near-zero-energy consumption buildings with renewable energy integration.
- Power electronic converters and drives.
- Modeling of communication–control coupled systems.
- Frequency regulation in low-inertia systems with high wind penetration.

### Guest Editors

Dr. Licheng Wang

Dr. Shuaibing Li

Dr. Ying Han

Dr. Fang Yao

### Deadline for manuscript submissions

closed (30 September 2024)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
