

Special Issue

Technical Problems in the Production and Distribution of Energy from Renewable Energy Sources

Message from the Guest Editors

The background and objectives of this Special Issue focus on research challenges and trends in renewable energy sources. In addition to electricity, there are other types of energy to be aware of in stationary and mobile solutions. Therefore, articles dealing with the above problems concerning all stages of energy production and operation of technological devices will be welcome. Undoubtedly, the materials describing completed concepts that have already been implemented or are on the verge of implementation will be of particular value for the reader. Keywords:

- renewable energy sources
- energy systems
- energy saving
- hybrid power system

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
