

Special Issue

Energy and Environmental Economic Theory and Policy

Message from the Guest Editors

The intersection of energy and environmental economics stands at the forefront of addressing some of the most pressing challenges facing society today. As the global community strives for sustainable development and seeks to mitigate climate change, thorough economic analyses and effective policy solutions are essential. This Special Issue aims to provide a platform for cutting-edge research that advances our understanding of the complex interactions between energy systems, environmental sustainability, and economic dynamics. We invite scholars from various disciplines to contribute their insights and expertise to this vital discourse. Topics of interest for publication include, but are not limited to, the following:

- Energy transition and decarbonization, including equity and income distribution issues.
- Energy policy design and assessment.
- Market-based approaches for energy and environmental governance.
- EEE—energy—economy—environment nexus.
- Economics of climate change mitigation.
- Energy-related behavioral economics.
- Economics of equity and justice in energy.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
