

Special Issue

Feature Papers in Energy Economics and Policy

Message from the Guest Editors

This Special Issue entitled “**Feature Papers in Energy Economics and Policy**” will focus on recent developments in the area of Energy Economics and the policies that relate to the investment, production, distribution, privatization, nationalization, competition, regulation, and pricing of energy. We seek the submission of empirical or theoretical work in energy economics, i.e., the production, distribution, storing, forecasting, financing, risk, taxation, trading, exchanges, networks, etc. These may refer to all sources of energy, i.e., coal, hydrocarbons and fossil fuels, renewable energy, nuclear energy, etc. We are focusing on innovative theoretical and methodological approaches in these fields. These approaches may have a significant impact on policy makers and all relevant stakeholders such as the industry in the production, distribution, and pricing of energy or the consumption of energy by both firms and household consumers. The issues of regulating, pricing, and even the environmental and social welfare consequences of energy in terms of income and poverty are also important.

Guest Editors

Prof. Dr. Periklis Gogas

Department of Economics, Democritus University of Thrace, 69100 Komotini, Greece

Dr. Donato Morea

Department of Mechanical, Chemical and Materials Engineering, University of Cagliari, Via Marengo, 2, 09123 Cagliari, Italy

Deadline for manuscript submissions

closed (18 September 2024)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
