

## Special Issue

# Advanced Energy Storage Technologies and Applications (AESAs)

### Message from the Guest Editors

This Special Issue is open to all types of energy (such as thermal energy, mechanical energy, electrical energy, and chemical energy) using different types of systems (such as phase change materials, batteries, supercapacitors, fuel cells, compressed air, etc.) that are applicable to various types of applications (such as heat and power generation, electrical/hybrid transportation, etc.). Topics of interest in this Special Issue include, but are not limited to, the following: - Novel energy storage materials and topologies; - Applications in electrical/hybrid-driven systems and electrical/hybrid vehicles; - Next-generation energy storage devices, systems, or techniques; - Large-scale energy storage system modeling, simulation, and optimization (including testing and modelling ageing processes); - Advanced control systems for energy storage - Business model for the application and deployment of energy storage; - Lifecycle analysis, safety, and reliability evaluation of energy storage systems.

---

### Guest Editors

Prof. Dr. Quanqing Yu

Prof. Dr. Chun Wang

Prof. Dr. Aihua Tang

Dr. Jinpeng Tian

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
