

Special Issue

Sustainable Transportation Systems with Electric and Autonomous Vehicles

Message from the Guest Editor

Potential research topics include, but are not limited to, the following:

- Planning and policy innovations for electric and/or autonomous vehicles.
- Public perception and acceptance of electric and/or autonomous vehicles.
- Vehicle-to-Grid (V2G) systems and their environmental benefits.
- Advancements in battery technology and their implications for EV sustainability.
- Freight transportation with electric and autonomous vehicles.
- Life cycle assessment of electric vehicles vs. conventional vehicles.
- The role of artificial intelligence in enhancing autonomous vehicle performance.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
