

Special Issue

Prospects and Challenges of Energy Transition

Message from the Guest Editors

We cordially invite you to submit your manuscripts to our Special Issue, "Prospects and Challenges of Energy Transition". The energy transition is currently observed in most developed economies. The transition to low-emission economies results in positive changes. However, many countries face numerous challenges, including economic, environmental, technological, and regulatory. The chances and challenges depend strongly on the local conditions, fuel mixes, and regulations. In this context, the Special Issue aims to collect original research or review articles on the prospects and challenges of the energy transition occurring in different regions. The Special Issue provides you with a platform for exchanging knowledge and experience. In particular, we encourage you to submit papers on the following topics: Energy transition; Decarbonization; Energy policy; Energy market; Energy economics; Power systems; Electricity prices; Renewable energy sources; Energy storage; Hydrogen economy; Demand response; Energy management; Electromobility; Fossil fuels; Hard coal market; Natural gas market; Oil market.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
