

## Special Issue

# Numerical Heat Transfer and Fluid Flow 2023

### Message from the Guest Editor

This Special Issue on “Numerical Heat Transfer and Fluid Flow” in the scientific journal *Energies* is addressed to specialists from all over the world who deal with mathematical modeling and experiments on heat and fluid flow. We welcome papers dealing with solutions of problems of scientific and industrial relevance in the broad fields of heat transfer and fluid transportation, including natural resources, biomedical, industrial processes, etc. Papers addressed to the Special Issue will not only solve specific engineering problems, but will serve as a catalyst on future directions and priorities in numerical heat transfer and fluid flow. Topics of interest for publication include, but are not limited to, the following:

- Numerical simulations of mass and/or heat transfer;
- Computational fluid dynamics;
- Experiments and simulations of single or multiphase flows, including Newtonian and non-Newtonian fluids;
- Modeling, optimization, and control of heat transfer and fluid flow;
- Mini and macro-flows;
- Turbulence;
- Modelling of turbulence;
- Flowing phase interactions;
- Energy saving processes, including increase or decrease in frictional losses and/or heat transfer.

---

### Guest Editor

Prof. Dr. Artur Bartosik

Department of Production Engineering, Faculty of Management and Computer Modelling, Kielce University of Technology, 25-314 Kielce, Poland

---

### Deadline for manuscript submissions

closed (31 December 2023)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
