Special Issue

Towards Achieving a Balance Between Environmental and Energy Consumption

Message from the Guest Editor

Striking a balance between environmental conservation and energy consumption is a key challenge for modern society. This balance requires a holistic approach, with investments in renewable energy, efficient technologies, energy efficiency measures, sustainable practices, and policies that promote long-term ecological health. This Special Issue is open to papers that address both ecological sustainability and the growing demand for energy in an era of rapid technological advancement and population growth. Key strategies to help achieve this balance include the following:

- Transition to renewable energy;
- Improving energy efficiency;
- Sustainable transportation;
- Carbon capture;
- Waste-to-energy systems (circular economy);
- Government policies, international cooperation, behavioural change, and awareness of energy consumption.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
