

## Special Issue

# Advanced Cooling and Heat Transfer Strategies for Energy-Efficient Renewable Systems

### Message from the Guest Editors

This Special Issue aims to bridge the gap between theoretical innovation and practical implementation by showcasing cutting-edge research in thermal science. Topics of interest for this Special Issue include, but are not limited to, the following:

- Next-generation cooling technologies: Innovations in evaporative cooling, dry/wet/hybrid cooling, regenerative cooling systems, natural cooling sources and low-carbon cooling technologies for renewable systems, net-zero energy buildings, data centers, and beyond.
- Material-driven solutions: Advances in phase-change materials (PCMs), nanofluids, and thermally conductive composites for enhanced heat dissipation and energy storage.
- System optimization: Computational and experimental studies on heat exchanger design, cooling tower performance, and integration with renewable energy systems.
- Sustainability-driven approaches: Strategies to minimize water usage, reduce parasitic energy losses, and leverage waste heat recovery in renewable systems.

---

### Guest Editors

Dr. Suoying He  
Prof. Xiang Huang  
Prof. Dr. Muzaffar Ali

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
