

Special Issue

Energy Systems and Applications in Agricultural and Mechanical Engineering

Message from the Guest Editors

This Special Issue is a continuation from our previous Special Issue “Energy Systems and Applications in Agriculture”, which was successfully closed in June 2022. In this special issue, we wish to attract publications focused on energy-related systems, materials, and applications, which are emerging in agricultural and mechanical engineering fields. Energy has become the most crucial requirement for the development of any nation. This special issue is aimed to showcase recent advancements and improvements of such energy systems and their technologies for various applications accordingly. This special issue will consider cutting-edge research works and review articles focus on energy system design; advance energy materials; integration of renewable energy; automation and control; modelling and simulation; life cycle assessment of energy systems and applications; alternate/sustainable energy sources; emerging production systems; agricultural and mechanical practices/applications.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
