

Special Issue

Advances in Wind Turbines

Message from the Guest Editor

Wind power has become the fastest growing and most competitive power. However, with the gradual increase of wind power level, the issue of safe and stable operation has aroused widespread concern. Therefore, in order to build a novel power system and promote the transformation of a low-carbon energy structure, it is essential to comprehensively study key technologies such as new wind turbine topologies, improved generator-side control strategies, wind power prediction approaches and grid-friendly control methodologies for large-capacity wind turbines. This Special Issue aims to present and disseminate the most recent advances related to the theory, design, modeling, application, control and condition monitoring of all types of wind turbines. Topics of interest for publication include, but are not limited to:

- Structures of wind turbines;
- Wind farm layout;
- Control strategies of wind turbines;
- Stability of the wind power system;
- Condition-monitoring techniques;
- Optimal design methodologies;
- Modeling approaches.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
