

Special Issue

Risk Management in Carbon and Oil Markets

Message from the Guest Editors

We aim to present and discuss frontier research in all areas related to carbon finance, risk management, and high quality, especially the important role of China's actions in carbon neutrality. With this Special Issue, we will focus on empirical analyses of the carbon market and its growing relevance worldwide. Papers should focus on global climate change on carbon, energy markets, and climate policies. Topics of particular interest include but are not limited to:

- Improve the pricing efficiency of energy markets;
- ESG and green investment;
- The role of climate policy on carbon risk;
- Evaluation of recent climate policy actions and outcomes on energy markets;
- Asset pricing issues resulting from climate change;
- Firm and household behavior resulting from carbon trading;
- Low carbon economy and energy;
- Fin-tech and carbon finance;
- Fiscal policy and carbon tax.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
