

## Special Issue

# Advanced Solutions for Carbon Capture, Storage, and Utilization

### Message from the Guest Editor

The urgency of mitigating anthropogenic carbon emissions has accelerated the development of carbon capture and storage (CCS) as a key pathway toward net-zero energy systems. CCS integrates multidisciplinary challenges across capture efficiency, transport, and long-term subsurface storage. Recent advancements in experimental geomechanics, rock-fluid interactions, reactive transport modeling, and in situ monitoring have significantly enhanced our understanding of CO<sub>2</sub> behavior in geologic formations, including saline aquifers, depleted hydrocarbon reservoirs, and caprock formations. However, questions remain about long-term sealing integrity, fracture responses, and the coupling of thermal, hydraulic, mechanical, and chemical (THMC) processes under in situ conditions. This Special Issue aims to present cutting-edge research focused on advanced technologies that support the secure and efficient deployment of CCS. We invite original research and reviews that encompass experimental studies, modeling approaches, and monitoring techniques relevant to CCS.

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
