

Special Issue

Planning Sustainable Energy Systems in the Global South Using Energy Modeling Software

Message from the Guest Editors

Most countries in the Global South are naturally endowed with diverse, renewable, solar, wind, hydro, and geothermal energy sources. These sources can potentially provide both rural villages and urban cities with sufficient electricity. However, access to electricity remains a key policy issue for most of the Global South, and it is important to increase renewable energy use and improve access to electricity for all. This Special Issue welcomes original research articles, review articles, and case studies/reports on using sustainable energy tools such as RETScreen, HOMER, LEAP, MESSAGE, OSeMOSYS, WASP, TIMES, and PVSyst for energy planning in the Global South. Topics of interest for publication include, but are not limited to:

- Energy decarbonization modeling;
- Energy transition modeling;
- On-grid and off-grid renewable energy modelling;
- Renewable energy financing and investment;
- Electric vehicles and hydrogen technology;
- Energy storage system;
- Smart energy systems;
- Techno-economic analysis;
- Smart transportation modeling;
- Energy efficiency and management.

Guest Editors

Dr. Abdulhameed Babatunde Owolabi

Regional Leading Research Center for Smart Energy Systems, School of Convergence & Fusion Systems Engineering, Kyungpook National University, Sangju 37224, Republic of Korea

Prof. Dr. Jeung-Soo Huh

School of Material Science and Engineering, Kyungpook National University, Daegu 41566, Republic of Korea

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
