

## Special Issue

# Solar and Wind Energy Prediction and Its Application Technology

### Message from the Guest Editor

This Special Issue is dedicated to original research on renewable energy forecasting technologies and their applications. Our aim is to disseminate knowledge and experience on topics from experts in various fields. The following topics will be focused on:

- Short-term renewable energy forecasting.
- Hybrid forecasting models for renewable energy integration.
- Machine learning and artificial intelligence for advanced renewable energy forecasting.
- Application of renewable energy forecasting in smart grids.
- Behind-the-meter solar generation forecasting technology and its applications.
- Power system operation technology based on renewable energy prediction technology.
- Renewable energy forecasting techniques related to the electricity market.
- Economic and regulatory aspects of renewable energy forecasting.

This Special Issue invites original and innovative research articles on renewable energy forecasting techniques and their application domains. The goal is to provide a comprehensive overview of the latest advancements and stimulate further research and development in this field.

---

### Guest Editor

Dr. Young-Min Wi

Department of Electrical Engineering, Sangmyung University, Seoul 03016, Republic of Korea

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
