

Special Issue

Innovative Approaches to Retrofitting for Sustainable Built Environments

Message from the Guest Editors

This Special Issue is in cooperation with the International Retrofit Conference 2025 (IRC'25), aims to present and disseminate the most recent advances related to the theory, design, implementation, and evaluation of retrofitting strategies for existing buildings.

We seek to showcase cutting-edge research and practical applications that are pushing the boundaries of what can be achieved in creating more sustainable and resilient structures. We encourage submissions that align with the conference themes and contribute to the global discourse on sustainable retrofitting practices.

Keywords

- sustainable retrofitting
- energy efficiency
- net-zero retrofit
- sustainable built environment
- retrofitting at scale
- retrofit regulations
- retrofitting strategies
- climate change mitigation

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
