

Special Issue

Biofuels, Biocarbon Materials and Bioproducts for Renewable Energy, Remediation and Sustainable Development

Message from the Guest Editors

As climate change and resource depletion drive an urgent need for renewable energy sources and eco-friendly materials, agricultural or industrial or municipal waste often seen as low-value biomass presents a renewable but underutilized carbon source. Harnessing its potential can help bridge the gap between environmental sustainability and energy needs, creating opportunities for innovative bioenergy technologies and environmentally friendly practices. This Special Issue will feature cutting-edge research that advances our understanding of low-value biomass conversion technologies and explore their applications in sustainable energy solutions and environmental remediation strategies.

Guest Editors

Prof. Dr. Quan (Sophia) He
Dr. Rahil Changotra
Dr. Sangué Oraléou Djandja

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
