

Special Issue

Energy Security, Transition, and Sustainable Development

Message from the Guest Editor

Energy security and sustainability are pressing challenges in today's rapidly evolving global landscape. As the world grapples with the need to transition from fossil fuels to cleaner, more sustainable energy sources, ensuring energy security has become paramount. This transition requires innovations in energy production, distribution, consumption, and infrastructure. Furthermore, achieving sustainable development necessitates an integrated approach that considers environmental, social, and economic factors, with energy playing a pivotal role in driving progress. This Special Issue aims to showcase the latest research related to the theory, modelling, application, technology, economic, and policy innovations that address the intersection of energy security, the energy transition, and sustainable development

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
