Special Issue

Artificial Intelligence in Renewable Energy System

Message from the Guest Editors

The rapid growth of artificial intelligence (AI) and the vital need for renewable energy (RE) can be recognized as the hottest topics of recent decades in which very fast developments have been recorded in the form of patents, articles, and textbooks. Within this Special Issue, both academic and industrial researchers are kindly invited to contribute and address advanced technologies and theories as well as the most recent developments on the AI role in renewable energy systems. This hot area of science continues to grow in popularity, and the results of this outstanding challenge will shed light on the future trends and patterns of the most demanding type of energy. This Special Issue intends to facilitate identifying auspicious directions for prospective investigations that will construct the future of our world.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
