

Special Issue

Challenges and Solutions in Energy Market: Energy Policy and Environmental Perspectives

Message from the Guest Editors

This Special Issue aims to investigate the current challenges of the energy sector within the context of new policy and environmental perspectives and to explore innovative tools, models, and policies capable of shaping resilient energy markets. Potential topics of interest include, but are not limited to:

- Environmental and economic impacts of decarbonization strategies
- Renewable Energy Sources technologies towards climate-neutrality
- Restrictions of large-scale energy storage technologies
- Role of fossil fuels in energy schemes: future perspectives
- Energy dependence and markets' stability under the new policy perspectives
- The role of subsidies and incentives in accelerating clean energy transitions
- Emissions trading schemes: benefits and challenges towards energy transition
- Case studies energy policy interventions
- Lifecycle environmental impacts of energy sources
- Policies for fostering innovation in clean technologies
- Green finance and carbon-neutral investment strategies
- Challenges in the security of supply

Guest Editors

Dr. Lefki Papada

Lab of Mining Engineering and Environmental Engineering, School of Mining and Metallurgical Engineering, National Technical University of Athens (NTUA), 15772 Athens, Greece

Prof. Dr. Dimitris Damigos

Lab of Mining Engineering and Environmental Engineering, School of Mining and Metallurgical Engineering, National Technical University of Athens (NTUA), 15772 Athens, Greece

Deadline for manuscript submissions

20 September 2026

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
