

## Special Issue

# Advanced Techniques and Technologies in Natural Gas Research and Engineering

### Message from the Guest Editors

The Special Issue is motivated by rapid changes in the global energy mix and opportunities arising from the flexibility and performance characteristics of natural gas. There have been many emerging techniques for effective management of the gas grids. This Special Issue will deal with novel optimization and control techniques for gas grids and natural gas end-use applications. Topics of interest for publication include:

- Optimization of operation of gas transport systems
- Gas distribution networks: managing the diversification of gas quality
- Recent software development in pipeline systems modelling and simulation
- Small scale LNG and distributed energy technologies
- Effect of Power-to-Gas conversion on gas sector
- Decarbonisation of the gas grids: blending biomethane/hydrogen and natural gas
- Natural gas end use applications for hybrid systems

---

### Guest Editors

Prof. Dr. Maciej Chaczykowski

Prof. Dr. Mariusz Łaciak

Prof. Dr. Andrzej J. Osiadacz

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

### Editor-in-Chief

Prof. Dr. Enrico Sciubba  
Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
