

Special Issue

BIWAES 2021—Biennial International Workshop Advances in Energy Studies "Empowering Communities, Beyond Energy Scarcity"

Message from the Guest Editors

This Special Issue refers to the 11th edition of BIWAES, which will take place in parallel to the European Roundtable "Consumption and Production in a plus 1.5°C World".

A New Energy Scarcity

Achieving sustainable economies and shared wellbeing calls for an urgent re-framing of the energy problem toward a balanced mix of solutions. The latter include technological improvement, use of energy resources consistent with their thermodynamic properties, a selection of environmentally friendly sources and carriers, suitable approaches to monitoring of impacts, lifestyle equity and reduction of energy poverty, and careful management of the energy-water-food-environment nexus.

Empowering Communities Interdisciplinary Evaluations

It clearly appears that the energy problem cannot only be addressed in thermodynamic or technological terms. A deeper understanding of trends, solutions and policies can only be achieved through converging efforts by different disciplinary sectors, so that economic, social, environmental, cultural, and psychological expertise converges into an innovative picture of local and larger communities toward shared wellbeing.

Guest Editors

Prof. Dr. Sergio Ulgiati

Prof. Dr. Hans Schnitzer

Dr. Remo Santagata

Deadline for manuscript submissions

closed (25 December 2021)

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
