

Special Issue

Applied Heat Pumps

Message from the Guest Editors

Heat pumps of various capacities have been utilised in industrial, commercial, and residential applications. Some examples are desalination, drying and dehumidification, space heating, hot water, steam generation, heat recovery, and simultaneous heating and cooling. The purpose of this Special Issue is to disseminate leading research findings and new knowledge in applications of heat pumps. We welcome high-quality and original works that have not been published or considered publishing elsewhere. The selected proposed manuscripts will be subject to a careful peer-review and editorial process.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
