

Special Issue

Conversion and Utilization of Solid Wastes and Biomass into Fuels including Green Hydrogen

Message from the Guest Editors

With increasing energy demands worldwide, big central solutions as also decentral and local solutions to treat residues/wastes and produce energy need to be developed in a cost efficient and ecological way. This Special Issue aims to present and disseminate the most recent advances related to the theory, design, modelling, application, and production of all types of bioenergy. Topics of interest for publication include, but are not limited to: - Green hydrogen production; - Waste to energy (big and small scale); - Bioenergy; - Advancements in the RDF technology and its utilization; - New developments in the energetic treatment of agricultural wastes.

Guest Editors

Prof. Dr. Satyanarayana Narra

Prof. Dr. Gert Morscheck

Prof. Dr. Gesa Beck

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
