

## Special Issue

# Impact of Biomass Combustion on Air Quality

### Message from the Guest Editors

Considering the rising awareness of the environmental effects of combustion emissions, studies on implementation of different emission reduction measures (e.g., optimization of the combustion process, fuel modification, flue gas cleaning) are valuable. The assessment of real-life user practices on emissions from small-scale biomass combustion is also needed to more accurately estimate the impact of this source on air quality. Taking into account that biomass combustion emissions can undergo varying atmospheric aging before human exposure, studies on aging processes also deserve attention in this Special Issue. Finally, studies focusing on the detailed characterization of aerosol properties are of great interest since these are connected to their ability to trigger toxicological responses as well as climate effects. Authors are invited to submit novel contributions in the form of critical reviews and research papers targeting any of these or other related topics.

- Aerosol aging
- Biomass combustion
- Emission factors
- Emission reduction
- Fuel improvement
- Gaseous compounds
- Particle chemical composition
- Particulate matter
- Pollutant formation mechanisms
- Stove/burner design

### Guest Editors

Dr. Célia dos Anjos Alves

Department of Environment and Planning, Centre for Environmental and Marine Studies, University of Aveiro, 3810-193 Aveiro, Portugal

Dr. Estela Vicente

Department of Environment and Planning, Centre for Environmental and Marine Studies (CESAM), University of Aveiro, 3810-193 Aveiro, Portugal

### Deadline for manuscript submissions

closed (14 July 2023)

## About the Journal

### Message from the Editor-in-Chief

*Energies* is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

---

### Editor-in-Chief

Prof. Dr. Enrico Sciubba

Department of Mechanical and Industrial Engineering, University  
Niccolò Cusano, 00166 Roma, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q1 (Control and Optimization)
