Special Issue

Environmental and Economic Evaluations of Building Energy Retrofits

Message from the Guest Editors

In this Special Issue, we welcome studies related to building energy retrofit evaluation methods or approaches, including but not limited to lifecycle costing and assessment, econometric models, multicriteria analysis, and decision-making tools.

- circular economy
- circular energy-retrofitting strategies
- energy retrofit evaluation
- energy efficiency analysis
- carbon reduction efficiency
- life cycle environmental assessment of energy retrofit
- economic analysis of energy retrofit
- energy refurbishment decision-making
- cost-optimal approach

Dr. Joseph H.K. Lai

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
