

Special Issue

CASES Vehicles and the Mobility of the Next Generation

Message from the Guest Editors

This Special Edition provides a place to discuss this research problem, given the increased interest in issues related to technological and technical progress in the field of CASES vehicles and the lack of publications related to this research topic. **Keywords:**

- Electric vehicle;
- Low emission vehicle;
- Innovative technologies;
- Evolution of drive units;
- Vehicle–infrastructure–software connection;
- Technological barriers;
- Electric vehicle operating costs;
- Charging stations;
- Intelligent software;
- Autonomous vehicle;
- Urban transport;
- Sustainable vehicle;
- Infrastructure for the mobility of the next generation;
- Processes digitization;
- Smart grids.

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief
