

Special Issue

COVID-19 and Sustainable Energy Transitions

Message from the Guest Editor

This Special Issue aims to provide a platform for sharing scientific approaches and effective policy interventions for transition to resilient and sustainable energy systems in the aftermath of the pandemic. The , , invites papers in the form of original research and reviews in one or more of the following topics: - Impact of Covid-19 on energy transitions - Pandemic: energy access, energy poverty, and equity - Covid-19 and climate change - Covid-19, digitalization, and the energy sector - Economic recovery packages and the energy expenditures - Role of resilient and sustainable energy systems in coping with global crises - Impact of Covid-19-induced lifestyle and behavioural changes on energy demand - Energy policy and governance in the post-pandemic era - Role of energy democracy and decentralization in achieving sustainable energy - Energy supply (fossil fuels and renewable energy) and the pandemic

About the Journal

Message from the Editor-in-Chief

Energies is an international, open access journal in energy engineering and research. The journal publishes original papers, review articles, technical notes, and letters. Authors are encouraged to submit manuscripts which bridge the gaps between research, development and implementation. The journal provides a forum for information on research, innovation, and demonstration in the areas of energy conversion and conservation, the optimal use of energy resources, optimization of energy processes, mitigation of environmental pollutants, and sustainable energy systems.

Editor-in-Chief

Prof. Dr. Enrico Sciubba
Department of Mechanical and Industrial Engineering, University
Niccolò Cusano, 00166 Roma, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, RePEc, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q1 (Control and Optimization)
